HR Manager

Dear Hiring Manager,

I am writing to express my interest in a Developer position. With a strong foundation in full-stack development and expertise in technologies such as Node.js, NestJS, Angular, React.js, React Native, TypeScript, Java, Spring Boot, MongoDB, and WebRTC, I am eager to contribute to your team by building scalable and high-performing applications.

At Perfectice Eduventure Pvt. Ltd., I worked as a Software Developer where I developed and optimized REST APIs using Node.js and NestJS to ensure scalability and seamless integration. I enhanced the performance of an Angular-based frontend by 40% through efficient state management and code optimization. I built a real-time proctoring system using WebRTC and Mediasoup, enabling live video streaming and screen recording. I also designed and implemented a code compiler using Docker for efficient and isolated test case execution, and developed a real-time analytics dashboard in React.js and WebSocket, capable of tracking over 500 metrics per second.

Beyond my professional experience, I have developed several full-stack projects, including DevSpace, a social media web application, and a CryptoCurrency Tracker, showcasing my ability to design, develop, and deploy complete solutions independently

I am particularly drawn to your organization's commitment to innovation, technical excellence, and impactful solutions. I believe my experience in backend architecture, real-time applications, and cloud deployment using AWS, Docker, and Kubernetes aligns well with the role.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and skills can contribute to your team. Please find my resume attached. I look forward to hearing from you.

Yours faithfully,

Soumik Bera
